A

AcademiX

THE OPERATING SYSTEM FOR ONLINE LEARNING IN MENA

INVESTOR OVERVIEW · V1 · APRIL 2026

Arabic-first learning, built for the way MENA actually buys and teaches.

A modern LMS that lets independent teachers, institutions, and employers launch, sell, and run online courses — with local payment rails, live classes, and AI-powered student insights built in from day

THE PROBLEM

MENA's online learners and teachers deserve better tools.

Global LMS platforms are English-first, built on Western payment rails, and ignore the realities of how Arabic-speaking users, institutions, and employers actually work.

No Arabic-native UX

Udemy and Coursera are written LTR-first. Arabic content is a second-class citizen — no right-to-left layout, no native Arabic UX, no Arabic instructor tooling.

Local payment rails ignored

Lahza, MyFatoorah, HyperPay — the gateways 250M+ people actually use — are not supported. Teachers lose 5–10% per sale to forex + processor fees, and some students simply can't check out at all.

Institutions stitch it together

Schools and companies today run Zoom + Google Forms + spreadsheets + a WhatsApp group. Every institution is reinventing the same broken workflow.

No platform serves all three sides

Independent teachers, teaching institutions, and corporate L&D each get a half-built tool or a misaligned product. Nothing scales from one teacher to a 10,000-seat enterprise.

> *The gap: a modern, Arabic-native, MENA-payment-native LMS that scales from a single teacher to an enterprise-wide training program.*

THE SOLUTION

One platform. Three audiences. One shared infrastructure.

AcademiX is a multi-tenant LMS designed around the reality that the same infrastructure can serve the independent teacher, the university, and the employer — each with the right surface for their role.

The AcademiX Platform — courses · payments · live classes · AI · messaging

Independent Teachers
Sell courses on the marketplace

Teaching Institutions
Universities, schools, bootcamps

Employer Organizations
Train employees, compliance reporting

SHIPPED

Lahza payments

Server-verified checkout, webhook HMAC, course purchases + subscription billing.

SHIPPED

AI risk scoring

Per-student engagement + risk level + factor breakdown + recommended interventions.

SHIPPED

Live classes

Weekly schedule, one-click join, "Live now / Soon" badges, per-section URLs.

WHO IT'S FOR

Three customer archetypes, one product surface each.

1

Independent teacher

> *"I have expertise. I want to teach. I don't want to be a web developer."*

- ✓ **30-min course launch**
  Title, content, price, schedule, certificate — one form, no wizard.
- ✓ **Local currency payouts**
  Lahza rails — get paid in ILS/JOD without Stripe or forex loss.
- ✓ **Student-risk radar**
  See who's falling behind before they drop, without scrolling 200 students.

2

Teaching institution

> *"We have 30 instructors. We need one place to manage them all — centrally billed."*

- ✓ **Multi-teacher org**
  Onboard teachers under one account; subscription caps shared across team.
- ✓ **Central finance**
  Single bill, per-teacher revenue breakdown, CSV / PDF exports.
- ✓ **Branding & theming**
  14+ theme presets, custom color picker, cover images per org.

3

Employer / Corporate L&D

> *"500 employees. Mandatory compliance by Q4. Plus a report for the auditor."*

- ✓ **Seat licensing**
  Buy N seats of a public course OR build private internal courses.
- ✓ **Assignment workflow**
  HR assigns courses to employees — no self-enrolment, no surprises.
- ✓ **Compliance reports**
  Who's done, who's overdue, who's at risk — exportable for audit.

PRODUCT HIGHLIGHTS

Every claim in this deck maps to code already in production.

No roadmap in disguise — every module listed below is live on `master`.

Course creation

One-form setup: title, description, pricing, per-section meeting times, batches, certificates — no multi-step wizard.

Live classes

Per-section join URLs, weekly grouped schedule with real-time "Live now / Starting soon" badges, one-click join.

Payments & subscriptions

Lahza integration with server verification, HMAC webhook signing, discount codes (% or fixed), monthly & yearly plans.

AI student insights

Engagement score, risk level (Low → Critical), grade prediction, risk-factor breakdown, recommended actions.

Cohort management

"Start New Batch" clones an entire course — lessons, assignments, exams, sections — with fresh enrollments.

Real-time messaging

SignalR-backed direct + course chat, unread counters, block / report moderation tools.

DEMO FLOW

From "nothing" to a paying student in four steps.

STEP 1

Teacher creates a course

Title, sections, meeting times, pricing — all in under 30 seconds on one form.

≤ 30s

TIME TO PUBLISH

STEP 2

Student buys with discount

Applies a promo code, redirected to Lahza checkout, pays in local currency.

1

CHECKOUT REDIRECT

STEP 3

Student joins live class

One click on a red "Live now" badge in the weekly schedule. Zoom/Meet opens instantly.

1 click

TO JOIN

STEP 4

Teacher gets at-risk alert

Dashboard surfaces a student whose risk score spiked after missing sessions.

Real-time

SCORE UPDATES

BUSINESS MODEL

Three revenue streams from one product.

STREAM	WHO PAYS	PRICING	% OF TARGET YEAR-1 REVENUE
Marketplace commission	Independent teachers	15% on every course sale	40%
Platform subscriptions	Teaching institutions & pro teachers	$30 / $80 / $200 per month (20% annual discount)	35%
Enterprise training	Employer orgs	Seat licenses + internal-content subscription	25%

15%
PLATFORM TAKE-RATE ON COURSE SALES

$144
AVG STUDENT LTV (GMV)

~3×
TARGET LTV / CAC AT SCALE

Subscription tiers (live today)

PLAN	MONTHLY	MAX COURSES	SEATS / COURSE	TOTAL SEATS
Starter	$29.99	3	30	90
Professional	$79.99	15	100	500
Enterprise	$199.99	Unlimited	Unlimited	Unlimited

All tiers CRUD-editable from the SuperAdmin panel — pricing experiments require no code changes.

MARKET OPPORTUNITY

A growing $Xbn MENA market, specifically underserved.

250M+

ARABIC-SPEAKING INTERNET USERS

The largest underserved linguistic block in online education.

20%+

YOY MENA E-LEARNING GROWTH

Fastest-growing regional e-learning market, 2023–2028 (HolonIQ).

Vision 2030

KSA HCDP TAILWIND

Every major Saudi employer now needs a compliance-training platform.

Why now

- **Local payment rails matured**
  Lahza, MyFatoorah, HyperPay now cover 250M+ payment-capable users the incumbents don't support.
- **Arabic-first workforce**
  Generation Z in MENA consumes content in Arabic first; they reject English-only platforms.
- **Post-COVID normal**
  Online-first training is now the default for corporates & institutions, not the exception.
- **Incumbents distracted**
  Udemy & Coursera are focused on Western enterprise deals; MENA is an afterthought.

Replace $X headline with sourced TAM figure before pitching.

COMPETITIVE POSITIONING

The only platform that serves all three sides, built for MENA.

	UDEMY	COURSERA	THINKIFIC	ACADEMIX
Arabic UI + RTL	—	Partial	—	✓
Local payment rails (Lahza, MyFatoorah)	—	—	—	✓
Live classes built-in	—	✓	—	✓
Employer seat licensing	—	✓	—	✓
AI at-risk detection	—	✓	—	✓
Multi-tenant organizations	—	—	Partial	✓
Open to MENA independent teachers	—	—	✓	✓

Our defensible moat

The **only** platform that simultaneously serves Arabic independent teachers, MENA teaching institutions, and GCC employer training — with local payment rails, Arabic-first UX, and AI analytics built in from day one. Not a port of a Western product; built from a blank page for this market.

TECHNOLOGY

Modern stack. Clean architecture. Secure by default.

Stack

FE — **React 19 · Vite 7 · TypeScript 5.9 · Tailwind CSS 3**
SPA architecture, 111 TSX components, 48 TS modules.

BE — **.NET 8 ASP.NET Core · EF Core · PostgreSQL 16**
Clean Architecture — Domain, Application, Infrastructure, API layers.

RT — **SignalR WebSockets (long-poll fallback)**
Real-time messaging + push notifications.

AI — **In-house engagement & risk scoring**
Server-side, deterministic, predictable cost — no external model dependency.

Security posture

- ✓ JWT access + refresh tokens, rotated on refresh
- ✓ Server-side webhook signature verification (HMAC SHA-256)
- ✓ Role-based policy enforcement at every endpoint
- ✓ Rate limiting (IP + endpoint level, in-memory)
- ✓ Soft delete everywhere — no data lost to fat-fingers
- ✓ Structured Serilog logging with correlation IDs
- ✓ Global exception handler (no stack traces leaked to clients)
- ✓ BCrypt password hashing, secrets in env only

Modular monolith today — ready to split into services when scale demands it. No premature architecture.

STATUS & TRACTION

Platform is production-ready. Pilot begins Q2.

50+
COURSES SEEDED

18
ROLE-BASED TEST ACCOUNTS

6
QA REGRESSION ROUNDS PASSED

100%
LAHZA SANDBOX FLOWS VERIFIED

What we've proven so far

- ✓ **Full feature parity with enterprise LMS competitors** — course management, subscriptions, payments, live classes, analytics, messaging, certificates — all shipped and tested end-to-end.
- ✓ **Lahza integration live** against their sandbox for both course purchases and recurring subscriptions, with HMAC webhook verification.
- ✓ **Engineering velocity** — 6 end-to-end QA cycles over the past two weeks, all outstanding bugs resolved.
- ✓ **Multi-role foundation** — Student, Teacher, Admin, Accountant, Secretary portals all implemented.
- ✓ **Clean architecture** — clear separation of concerns makes scaling the team straightforward.
- ✓ **Demoable today** — public tunnel, 18 test accounts, real data — any investor can test the platform live in under 60 seconds.

Replace "pilot begins Q2" with the name of the first signed institution as soon as confirmed.

ROADMAP

Next 6 months of execution.

Pulled directly from our internal tracker — same document the engineering team ships from.

Q2 2026 · NOW

- Ship org types A + B (teaching institutions vs employers)
- Finance dashboard — earnings, payouts, per-teacher splits
- Mobile + tablet responsive layout
- First paying pilot institution onboarded

Q3 2026

- Full Arabic + RTL across the product
- Employer-type organization rollout
- Native marketing site + self-serve signup
- Payout automation (weekly bank transfers)

Q4 2026

- First enterprise training contract (500+ seats)
- Native mobile apps (React Native)
- Expand payment rails → MyFatoorah + HyperPay
- Analytics v2 with cohort-level insights

Q1 2027

- SOC 2 Type I
- Saudi market entry
- White-label offering for universities
- Public marketplace launch event

Engineering investments

3 → 8 engineers (Q2–Q3), 1 designer, 1 devops, 1 data/AI specialist by Q4. Backend → AKS on Azure. Frontend → CDN + edge caching.

THE ASK

Raising a seed round to scale engineering and land the first cohort of paying institutions.

$[amount]

SEED ROUND, 12 MONTHS OF RUNWAY

- **Engineering (~60%)**
  Scale from 3 → 8 engineers across backend, frontend, mobile, data.
- **GTM & sales (~25%)**
  Head of MENA sales, first pilot activations, institutional contracts.
- **Marketing & ops (~15%)**
  Content in Arabic, paid acquisition tests, legal + finance overhead.

What investors get

- ✓ **Proven execution team**
  Entire platform shipped and QA-tested before opening the round.
- ✓ **Dual-rail unit economics**
  Marketplace commission plus SaaS subscription plus enterprise licensing — never a single point of revenue failure.
- ✓ **Defensible geography**
  Arabic UX + MENA payment rails = incumbents can't flip a switch to compete.
- ✓ **Clear path to $100M+**
  B2C marketplace + B2B subscriptions + enterprise training — three compounding tailwinds in one platform.

Let's build MENA's learning OS together.

We'd love to walk you through a live demo, share current numbers, and answer any question you have.
